**\*2 VB: Course mini vérin avec tourillon inter**

\*2 VB: Mini-Zylinderhub mit Zapfen

\*1 Note: Add the value of the cylinder stroke to the maximum dimension XV to obtain the maximum achievable position of the trunnion.

- Check that the trunnion is positioned between the values XV min and XV max + stroke.

- Watch out for the possible mini courses.

**\*1 Nota: ajouter la valeur de la course du vérin à la cote XV maxi pour obtenir la position maximum réalisable du tourillon.**

- Vérifier que le tourillon est positionné entre les valeurs XV mini et XV maxi + course.

- Attention aux courses mini réalisables.

\*1 Hinweis: Addieren Sie den Wert des Zylinderhubs zur maximalen Abmessung XV, um die maximal erreichbare Position des Zapfens zu erhalten.

- Überprüfen Sie, ob der Zapfen zwischen den Werten XV min und XV max + Hub positioniert ist.

- Achten Sie auf mögliche Minikurse.
